WORK EXPERIENCE

Seagate Technology   *Longmont, Colorado*
System Analyst   Jan. 2014- *Now*

- System administration for internal database servers -- Installing, maintaining, monitoring, and updating them. Uses tools such as Puppet, PuppetBoard, Nagios Log Server, and Nagios.
- Web development (PHP, HTML, JSP, ASP.NET), application development, and test floor support for the local Longmont site.

Seagate Technology   *Longmont, Colorado*
Intern   May 2013- Dec. 2013

- Worked with the Global Failure Analysis Issue System Team to write logger, a log scrapper and statistical analysis web application in Python. This application's purpose was to spot problems with trends within raw data, identify outliers and compare run times to make sure the system is not lagging behind when updates were made.

CSU College of Business   *Fort Collins, Colorado*
Web Developer   Dec. 2011- May 2013

- Created and designed various forms in Visual Studio using ASP.Net and C# throughout College of Business Website.
- Worked with other employees to create web applications and web pages for different departments within the College of Business.
- Used Sharepoint for content management and website deployment.

CSU College of Business   *Fort Collins, Colorado*
IT Help Desk   Dec. 2011- May 2013

- Maintained hardware for the use of students and faculty
- Helped other students with a variety of technical problems, including troubleshooting
